PROFESSIONAL SUMMARY

AWS Certified Solutions Architect with hands-on experience designing secure, scalable and highly available AWS cloud solutions. Strong understanding of AWS networking, compute, storage, serverless, monitoring and infrastructure services gained through certification, practical labs and cloud projects. Brings over nine years of engineering, enterprise infrastructure and technical project delivery experience, providing a strong foundation for designing secure and scalable cloud solutions.

CORE TECHNICAL SKILLS

AWS: EC2, Lambda, IAM, VPC, CloudFormation, S3, DynamoDB, RDS, CloudWatch, API Gateway, Auto Scaling, ELB, Route53, Glue, Athena, QuickSight, SNS, SQS, AWS IoT Core.

NETWORKING: TCP/IP, DNS, DHCP, CIDR, Route Tables, Internet Gateway, NAT Gateway, Security Groups, NACLs, VPN, Direct Connect (knowledge).

TOOLS: Linux, Terraform, CI/CD, Git, GitHub, Python, Bash, Docker (Foundational), VS Code, Jupyter.

PROFESSIONAL EXPERIENCE

Solution Architect – Mentor Optimal-IT (AWS professional partner) October 2023 – Present
Provide cloud architecture mentoring and technical guidance to AWS Academy students, supporting the design, deployment and optimisation of secure, scalable AWS solutions through hands-on labs and project-based learning.

Key Contributions

- Mentored students in AWS architecture, networking, security and serverless application development using AWS best practices.
- Designed and reviewed cloud solutions leveraging Amazon EC2, VPC, IAM, Lambda, API Gateway, RDS, DynamoDB, CloudFormation and CloudWatch.
- Guided learners in implementing highly available, fault-tolerant and cost-optimised cloud architectures aligned with the AWS Well-Architected Framework.
- Supported troubleshooting, architecture reviews and cloud deployment activities across practical AWS projects.
- Contributed to the development of real-world cloud labs and solution architecture exercises.

Achievements

- 500+ hours of hands-on AWS cloud laboratories and mentoring.
- AWS Certified Solutions Architect – Associate.
- Practical experience designing cloud solutions for web applications, serverless architectures, IoT and data analytics workloads.

Electronics Engineer – Retail solutions (Johnson Controls) September 2025 – Present
Support enterprise retail technology infrastructure across multiple UK customer sites, delivering installation, commissioning, maintenance and technical support for network-connected systems.

Key achievements

- Configure, deploy and support enterprise IP-based infrastructure across distributed customer environments.
- Perform technical troubleshooting and root cause analysis to restore critical business services.
- Support enterprise networking including TCP/IP, IP addressing, DHCP, PoE switching and connected infrastructure.
- Produce technical documentation, commissioning reports and customer handover documentation.
- Collaborate with customers, engineers and project teams throughout deployment lifecycles.
- Maintain high customer satisfaction while managing multiple priorities across geographically dispersed sites.

AWS Projects

Cloud-Based IoT Air Quality Monitoring Platform - University of South Wales | 2023

- Designed and implemented an end-to-end AWS IoT solution for collecting, processing and visualising real-time air quality data using LoRaWAN and AWS services.
- Built serverless data processing workflows with AWS Lambda, AWS Glue, Amazon Athena and Amazon QuickSight to automate data ingestion, analysis and reporting.
- Integrated IoT devices with AWS using secure APIs and applied IAM security best practices to ensure secure cloud communication.

Technologies: AWS IoT Core • Lambda • S3 • DynamoDB • Glue • Athena • QuickSight • API Gateway • IAM • CloudFormation

AWS Network Architecture for Web Application - AWS Skill Builder | SimuLearn

- Designed and deployed a secure AWS network architecture using Amazon VPC, public subnets, route tables and an Internet Gateway.
- Configured **Security Groups** and launched Amazon EC2 instances across multiple Availability Zones to host a highly available web application.
- Implemented AWS networking best practices for secure internet access, traffic routing and high availability.

AWS Services: Amazon VPC • EC2 • Internet Gateway • Route Tables • Public Subnets • Security Groups

CERTIFICATIONS

AWS Certified Solutions Architect – Associate 2026

EDUCATION

MSc Electronics and Information technology (MERIT)	University of South Wales	2023
